ORDER INFORMATION

C-TS combined door lock, the fabricator's choice

Combined lift lever and split spindle door lock.

The MACO PROTECT C-TS combined door lock enables the fabrication of a wide range of easy to operate door styles from a single multipoint door lock.

- Highly secure multipoint locking system
- Single function lock for use as a lift lever or split spindle operated door lock
- Smaller compact central lockcase
- The dead bolt is operated from the lever handle reducing the force required to lock the door
- MACO easy latch reduces noise and the force required to latch the door
- MACO easy latch release ensures a simple reversal process without the need for tools
- The spindle pack controls the function of the lock:
 - Solid Spindle bar = Lever lever function
 - Split Spindle Pack = Split spindle function
- Non handed lock design
- Reduced operating forces through:
 - Increased handle movement
 - MACO 'D' drive technology
- Suitable for both sprung and unsprung handle sets
- Can be used with two and three screw fixing handles
- Forged steel dead locking hook bolts
- Passive hook design for security and not weather performance
- Compression and weather performance via MACO standard locking cams
- Small compact hook case design

Setting new standards in door lock technology

Setting new standards in door lock technology.

The MACO PROTECT C-TS combined door lock is setting new performance standards for doors fitted with multipoint door locks.
